The amendment filed May 12, 2005 has been entered and made of record as paper no. 0505.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Abraham et al (US 2001/0040778 A1, cited by Applicants).

Abraham discloses a method of forming a magnetic memory cell junction comprising the step of patterning a mask layer above a stack of layers and alternately etching and implanting dopants into exposed portions of the stack of layers. Note figures 10-13 of Abraham.

Claims 1-8 are allowed.

Claims 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The other references are cited to show other structures pertinent to Applicants' disclosure.
